Build empathy

The information you add here should be representative of the observations and research you've done about your users.

THINK
think and feel
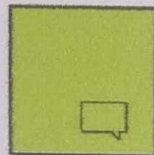

SEE
what does he see

Lighting

Using the concept of solar

But solar light brightness control using sensor

Air conditioners

Fingertips smartphone

non- It's wired so set the CCTV

Locks

whether monitoring selection street light

Every device controlled but IOT connect same

LAN, any local wi-fi

20k resister, connect LED, BC547 PIN, battery clipper

Control brightness level using sensor

Reduce costs for energy and maintenance

HEAR
what does he hear

DO
say and do
